Citi: Current Use Cases

	CITI Project	Description	Point(s) of Contact
EXPAND	Caerus - Pre and At Trade Risk Platform	Caerus application for performing risk checks for Cash and Delta 1 Products. This is an automated system used for the trading/execution within the equities front office	Shailej Dossii
	CARD FRAUD PREVENTION	IDENTIFIES PAYMENT-CARD ACCOUNTS THAT ARE LIKELY TO HAVE BEEN USED FRAUDULENTLY. FALCON EMPLOYS COMPLEX MODELS OF FRAUDULENT BEHAVIOR TOGETHER WITH PROFILE OF INDIVIDUAL CARD USE. THE MODELS ARE FORMULATED THROUGH THE USE OF FAIR ISAAC PROPIETARY NEURAL NETWORK TECHNOLOGY.	David Carrilo
	CitiQuote	Citi Quote is a Request For Quote (RFQ) workflow and state management system for Flow Structured Products delivering on-demand OTC Option pricing and Order placement. Prices are generated in real time using Equities Live Risk Pricing System (EQRMS). Clients can solicit prices from Citi Quote either directly using CitiVelocity web portal, FIX, and Mail. Upon Order placement the trades are booked within Equity derivatives platform via SETI and hedged by Citi Traders (internally).	Rajesh Vanchishwaran
	CitiDirect	Internet front end system for customers to manage their cash flow. Provides ability for customers to initiate local and cross border payments and retrieve information on same via reports, inquiries and data export.	Eamon Walsh//Rahull Saxena
	CitiDirect BE Portal	The CitiDirect BE Portal is a web site that offers a broad array of resources and services to external customers of the Citi Transaction Services (CTS) business. The portal is a gateway to the various CTS products and services, and also is used to support our white label clients (FI clients, Trade Supplier Finance clients, etc).	Ahmed Zenith Kamaldeen
	CitiDirect ECS	CitiDirect enables Citi's TTS Institutional clients to submit and authorize payment and trade transactions, manage their cash positions, and complete reconciliation through rich reporting and statements functionality. CitiDirect ECS is the 3rd generation iteration of CitiDirect, and delivers CitiDirect services to clients through containerized modular components and services.	Vishesh Khandelwal
	CitiFX Velocity	Citi FX Velocity is an award winning proprietary FX trading platform, targeted for professional traders, providing sophisticated trading capabilities, like stack and algo trading. The application also serves as a launching pad for FX click and FXOO, and is used globally by both internal and external clients.	Sathappen Lakshmanan
	Commodities - Market data	Commodities Data Service System aggregates, store & disseminate all commodities market data required for risk & pricing within commodities & also for other asset class. Commodities market data includes Eod settlements & desk marks (like Forward, Vols etc)	Namrata Pandey
	eDealer	eDealer is a web-based Treasury Front Office system tailored to the needs of the FICC group. The application provides real-time risk management for dealers of Foreign Exchange, Money Markets, Fixed Income (Securities) & Derivatives transactions. Key application features include online risk analytics (P&L, DV01, MPRs, etc), automated/manual transaction capture, pricing, credit check and complete deal workflow functionality including online interface to various back office systems such as Flexcube	Karthik Sankarasubramanian
	Fraud Detection System - Korea	It is a system that effectively detects and extracts fraudulent uses of credit cards by immediately representing managers Rules in the Knowledge engine that models Korean types of credit card transactions on the FICO s solution to detect fraudulent card uses through Falcon Fraud Manager package provided by FICO(Fair Isaac Corporation).	Hwan-Chul Jwa

Citi: Current Use Cases (Continued)

	CITI Project	Description	Point(s) of Contact
EXPAND	FX STIRT PRICING PLATFORM	The STIRT Pricing platform will be a single, global system supporting the needs of our G10 and EM businesses in the provision of dealable forward prices to our FX Sales dealers and eCommerce channels. It will be replacing the current price making applications (ROC and Pebbles). The new platform leverages the proven technology stack that was used to build the autotrader platform.	Naveen Ramaka
	FXLM DATA SERVICES	Global Foreign Exchange Common Services Platform. For e.g. Credit Service, Calendar Service, Static Data Service, FX Product Gateway, Interest Rate Service, etc.	Sahadeva Musalikunta
	Global Transact Platform	Publicly accessible internet website/mobile servicing the high net-worth clients of The Citigroup Private Bank. Features available on this site include client funds transfer and loan payments. The application is the primary portal for CPBs ultra high net worth clients. The portal interfaces with a number of backend data services to pull account, client demographics, real time account balance and book the transactions	Santosh Akuthota
	In View Financials	Publicly accessible internet website servicing the high net-worth clients of The Citigroup Private Bank. Features available on this site include detailed portfolio views across complex account aggregations, personalized market data and news, investments marketing material, financials reporting, transacting and secure online messaging to the private banking team. The application is the primary portal for CPBs ultra high net worth clients.	Saleem Mir
	MAGNET	Bespoke Multi-Asset, model driven index Strategies. Magnet Platform is a cross-asset Data Engine & an analytics-based Calculation Engine that supports end-end lifecycle of CIS indexes	Arun Govindasamy
	Proteus Realtime Risk FX Options	Trading tools to allow Traders to see their Position throughout the day as events such as market data or changes in the trade population occur. The Applications listen to Trade events from Proteus Trade Processing and Market data from Simpliciti Market Data Services and calculate aggregated risk for the trader's books using CFX analytics While trades (confidential) data client names are not disclosed across the application to the end user	Santosh Gadkari
	Proteus Realtime Risk Stirt	Trading tools to allow Traders to see their Position throughout the day as events such as market data or changes in the trade population occur. The Application listens to Rate products from sources such as TPS and eDealer as well as Curves published to the MQA team by the traders. In will then use dpAddins analytics to calculate and aggregate position for the trader's books.	Mandar Deshpande
	SIMPLICITI - RATES	The Simpliciti rates platform implements a global data services layer distributing trades and market data globally. A risk engine capable of calculating risk across the rates business. Finally, a risk aggregation service that consolidates risk across the business globally. Our mission is to ensure risk, pnl, and PAA (profit and loss attribution analysis) is accurate and on time.	Bartosz Bednarowicz
	SONAR Dashboard	A Global FX Sales Tool allowing user analysis, reporting and maintenance functions for Client Information. The application is also a Client Relationship Management Tool, allowing Salesperson's to track their client interaction such as phone calls, tasks, appointments etc. The Application also has an integrated telephony function, allowing automatic pop-up of client information (including trading patterns and historical trade information) on call recognition.	Abdul Azeez

Citi: Current Use Cases (Continued)

	CITI Project	Description	Point(s) of Contact
EXPAND	Trader Toolkit	Trader Toolkit (TTK) is a performant data analytics and visualization framework. HVFX allows traders to quickly understand time series data in the context of relevant market events, affording them the ability to perform numerous calculations in real-time. Users include the FX options desk and LM spot traders.	Alexandru Dumitru
	Citidirect NextGEN	Digital transformation of the CitiDirect corporate portal. CitiDirect is operated by ICG's Treasury and Trade services. This is the way all corporate customer interact with Citi. Very strategic and highly visible.	Anoop Deshpande - Channels Rahul Saxena MD Channels Amit Mukherjee MD Big Data
	TRIMS Processing & Imaging	Using Couchbase as an in-memory cache for storing Master / Reference data. Primary use-case is to provide low latency access of Master data to applications that require it. There are multiple upstream oracle database tables, whose data will be stored as documents, to be served via Couchbase.	Debottam Choudhury
	GFT Accounting Services Workbench	ASW will serve as a repository for all of the accounting rulesets used across Citi consolidating rules from across 100+ existing solutions. Once complete this will be used to review and minimise the account rules in place	Vinay Atmakur
	GFT FDAR	Solution for the short-term storage of Digital asset receipts. Part of Citis strategy with virtual crypto receipts	Aditya Argawal
	GFT CCAR Analytics	Balance sheet forecasting to support CCAR across 400+ analysts (more detail needed)	Chris Ahrendt
	ICG Capital Markets	Replacement cache to replace Gemfire for a trading application that aggregates FX data across multiple 3rd party sources	Balaji Jayaraman
	TTS - CPI	Citi Payments Insights	Zainab Vora
	ICG - Markets – LENS	Trading application (Lens), which is used to monitor trade orders and analyze market trends. The goal of this application is to help Citi internal traders analyze and place orders based on these market trends and determine the performance of their trading algorithms.	Akanksha Sharma / Gopal Karthikeyan
	Global Risk	Consent Order Global Risk Reporting	Steve Deakin
